Cristhian Mercado Cespedes

Web designer and developer

Profile

Hi, I'm Cristhian Mercado Cespedes, a systems engineer residing in Bolivia, specialized in web development. During my career I was lucky enough to learn about web technologies.

Learning HTML CSS and Javascript on my own opened the way to Frontend frameworks and later Backend. Design was my main motivation and along the way I learned about UI/UX design.

Practices

Sistema web de cotizaciones UMSS │ frontend desarrollador
february – july 2021

Development of a web system to support the quotation process of the Universidad Mayor de San Simón. This project was carried out for the Software Engineering Workshop subject, the project was developed by a team named Levitasoft SRL, where I contributed as a designer and front end developer.

Dactilosaurio │ full-stack developer
currently in development

Typing/typing game for the web, where you can practice and play with friends to learn and test your typing speed

Examenes online con reconocimiento facial │ frontend developer
march – june 2020

Practice of the Artificial Intelligence subject, where we sought to solve the problem of taking online exams with facial recognition to identify students

Gestor de servicio SAMBA
october – november 2020

Practice of an application to manage the SAMBA server in the OpenSuse 15.1 Linux distribution that interacts with the user through a browser interface.

Restaurant y pedidos │ frontend developer
november 2020 – january 2021

Practice on the consumption of REST API and product management for an ordering system based on the requirements of a restaurant.
